

GRILL MASTER

HEAVY DUTY GRILL CLEANER

Specially formulated for quick & easy removal of baked-on carbon deposits & grease from all grill surfaces without dangerous splattering or toxic fumes associated with most conventional cleaners.

Grill Master is also effective removing carbon from troublesome areas of hot ovens. Use grill master to wipe up slippery grease on kitchen floors, stainless steel, and walls.

For hot ovens - simply spray on - let sit for one minute - wipe off with a damp cloth.

DIRECTIONS

- 1) Grill temperature should be 325 - 425 degrees F.
- 2) Starting from back of grill spray or pour 3 to 4 oz. throughout the grill surface.
- 3) Using a spatula, spread GRILL MASTER over heavily carbonized areas (works in less than 1 minute) then scrape into front well.
- 4) Reactivate Grill Master with one cup of water working with spatula as in step 3.
- 5) Wipe to a clean sparkling grill with a towel soaked in water.
- 6) Season grill with any vegetable oil and allow grill to cool.

FAST ACTING, EASY TO USE, ECONOMICAL
