

STRIPPSOL

EXTRA HEAVY DUTY STRIPPER

Strippsol is specially designed for one of the toughest and most costly maintenance jobs - wax and finish stripping.

It is formulated to attack any kind of wax or water emulsion resin finish and is especially effective in stripping metal interlocked acrylic finishes.

Strippsol is particularly outstanding in the removal of heavy buildup along edges next to baseboards. Its unique wetting ability softens and emulsifies coat after coat of old and "yellowed" wax or finish.

Use 1 part Strippsol to 3 parts hot water for heavy build-up. The dilution could be as little as 1 part Strippsol to 10 parts hot water for lighter operations.

SAVES TIME AND LABOR
