

## WASH & WAX

### *CAR WASH SOAP*

Wash & Wax is a specially formulated cleaner that produces a uniquely clean surface when used on vehicles. A protective monomolecular film is left behind which glistens without wax or oils and is resistant to fingerprints and does not attract and hold dust.

Wash & Wax leaves a wax-like shine and will not harm waxed finishes. It is non-streaking, requires no rubbing, can be used in spray applications, and works well in either hot or cold water.

Mix 5 gallons of Wash & Wax into 50 gallons of water, then dispense into the soap arch. For addition to the reclaim pit, add Wash & Wax until suds are visible.
